From: Lee "Pat" Gochnour
Subject: Lisbon Valley Project - Fall 1999 Exploration Update

COMMENTS:

Mr. Gallegos:

I tried to reach you via phone this morning. Joel indicated that you are expected back --2:00 P.M. this afternoon.

Drilling activities at the above referenced project have progressed smoothly this fall, and we are nearing the end of the program. The geologist at the site has inquired about the possibility of "adjusting the location of Site B," which is located on State Trust Land in Section 36 - T 30 S, R 25 E. The results of current drilling indicate that Site B would be better drilled to the east of Site A (approximately 500 feet), rather than to the south. This proposed adjustment will not involve any additional surface disturbance, and will be located within an existing access route. A map showing this location is attached for your review.

I have notified Mr. Stokes (State Trust Lands) of this adjustment request. He indicated that he is fine with this request, as long as I document the adjustment.

Can you please review this request and get back to me at your earliest convenience? Our current plans call for Site B to be drilled this Saturday (10/23/99).

I am traveling this Thursday and Friday (10/21/99 - 10/22/99). I will be checking messages regularly. If you have immediate needs and cannot reach me, you can contact Bob Prescott (435-259-3077). Thank you for your consideration.

Lee "Pat" Gochnour
